

PUREPROTM

Automatic Dialyzer Reprocessing System

Innovative Design

User-friendly

PUREMEDITECH GROUP

PUREPRO: Dialyzer reprocessing System is a machine with perfectness comes from professional and advanced technology, that makes our product legal ,safe and stable.

Intended Use: Dialyzer Reprocessing System is used for clean, sterilize, test and effuse reusable dialyzer used in hemodialysis treatment by the same patient.

Feature and Benefits

Technology

- Double hydraulic for Anti-cross infection control
- Customize time proses
- Manual process can do

Storage

- Reload data process up to 200.
- Easy data transfer via USB port.

User Friendly

- Can store 10 types of dialyzer model.
- 10 inc Touch Screen for display and operate machine.

Safety Use

- Anti-cross infection control : Extra blood port header to prevent infection among patients.
- Accuracy & Safety : Automatic Disinfectant Dilution

PUREPRO Specifications

Model	PUREPRO (Double Station)
Electrical Requirement	Power Supply: AC 220V, 50Hz-60Hz, 2A Input Power: 150W
Weight & Size	Weight: 35 Kgs Size: 500mm x 420mm x 620mm
Time Reprocessing	10-12 Mins / cycle
Water input Pressure & Temperature	Pressure: 0.15 ~ 0.35 Mpa (21.75psi – 50.75psi) Temperature: 5°C - 40°C
Min water Inlet flow	1L/min
